

SkyLine/SkyBest

Seeking applications for the following full-time position:

IT Systems Administrator I in West Jefferson.

Develops and manages information processing and office automation systems for the company. Designs, installs, and maintains information technology infrastructure. Provides installation and maintenance services and support for the corporate network (hardware and software). Installs and configures new servers. Maintains current anti-virus and service packs for all workstations and servers. Maintains reliable documentation of network and server configurations. Troubleshoots and resolves hardware and software problems for end-users.

A minimum of a four year degree in Information Systems or closely related field is required. Preferred experience in database, network, or system administration. System administration and certification in Cisco, Linux, Microsoft or other related field is a plus. Proficiency in computer system operations, WAN technologies, and demonstrated analytical skills is required.

Please complete an employment application by 5:00 pm October 6, 2023.
