

SkyBest Internet Guardian

Powered by TrendMicro

Download Instructions

IMPORTANT! First, you must uninstall and remove current antivirus software from your computer before installing SkyBest Internet Guardian. This includes removing any previous TrendMicro antivirus software.

1. Go to your computer's Control Panel.
2. Click on Programs and Features.
3. Scroll down and click on antivirus programs.
4. Click uninstall.
5. Follow the simple directions from your computer to complete the removal of the software.
6. Repeat these steps until all antivirus programs are removed from your computer.
7. You are now ready to install SkyBest Internet Guardian.

[Click Here](#) or visit skybest.com/guardian to start your SkyBest Internet Guardian download.

1. Click Run to start download.
2. Click Yes to allow program to make changes to your computer.
3. The process will begin with a System Check to make sure that your computer is ready for installation.
4. Enter the Serial Number provided by SkyBest, then click next.
5. You must accept terms of License Agreement, and then click next.
6. SkyBest Internet Guardian completes the installation.
7. Enter computer name and e-mail address.
8. Protection Activated screen will appear.
 - a. You have successfully installed SkyBest Internet Guardian.
 - b. After closing the Protection Activated screen a TrendMicro icon will soon appear in your Windows system tray (usually the bottom right-hand corner of your computer screen). To customize your protection, open the main console by double-clicking this icon. See the Frequently Asked Questions guide for more information on customizing your SkyBest Internet Guardian product.
9. To ensure that you have the latest SkyBest Internet Guardian updates, double click the TrendMicro icon to open the main console.
10. Click "Update Now."
11. SkyBest Internet Guardian will search for and process any available updates.
12. You are now fully protected.

*Note: You can register up to 3 computers with one SkyBest Internet Guardian subscription. The steps above will need to be completed on each device to activate the security software.
